

Gallows Dual True Bypass Looper

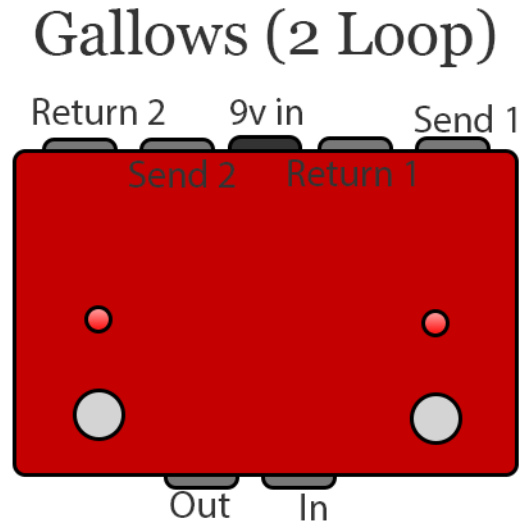

Instruction Sheet

Hello, and thank you for your purchase of the Gallows Dual True Bypass Looper! To the right is a diagram of the inputs and outputs on your Gallows to help you figure out how it's used.

Thanks again!

Ben

Vein-Tap.com

1. In: plug your guitar / output from previous pedal / amp FX loop send in here.
2. Send 1: connect this to the input of the first pedal in your first true bypass loop.
3. Return 1: connect this to the output of the last pedal in your first true bypass loop.
4. 9v In: If you're using the LEDs on the Gallows, plug a standard 9v, centre negative, 2.1mm power jack plug here (standard pedal power supply).
5. Send 2: connect this to the input of the first pedal in your second true bypass loop.
6. Return 2: connect this to the output of the last pedal in your second true bypass loop.
7. Out: connect this to your amp / input from next pedal / amp FX loop return in here.
